SA

SUMMARY

I am a B.Tech student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in full-stack web development. My technical skills include proficiency in Java, Python, and JavaScript, as well as frameworks like ReactJS and Spring Boot. I have successfully completed internships and projects, showcasing my capability in developing and deploying applications on cloud platforms.

EXPERIENCE

Intern

Airbaclabs Pvt Ltd

05/2023 – 06/2023 • Bengaluru

Full Stack Web Development

- Designed and built responsive web applications using HTML, CSS, and JavaScript.
- Gained practical exposure to developing and deploying full-stack web applications on cloud infrastructure.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

Narasaraopeta Institute of Technology (JNTUK)

06/2021 – 03/2025 • Narasaraopeta, AP

Intermediate Education in MPC stream

T.S. Reddy Jr College

06/2019 – 03/2021 • Piduguralla, AP

Secondary School Education

Vikas High School

06/2017 – 03/2018 • Piduguralla, AP

CERTIFICATIONS

Java Full Stack Developer

Java Full Stack Developer certification from CV Corp

Java Full Stack Certification

Java Full Stack Certification from Wipro Talent Next

Machine Learning

Machine Learning certification from Infosys Springboard

Joy of Computing Using Python

Joy of Computing Using Python – NPTEL

Introduction to Internet of Things

Introduction to Internet of Things – NPTEL

LANGUAGES

- Java
- Python
- JavaScript
- SQL

KEY ACHIEVEMENTS

★ BusinessHubs Project

Successfully built and deployed a multi-user Vyapar-like Business Management System with various functionalities.

■ Note-Taking Web Application

Developed a full-stack note-taking web application with user authentication and persistent storage.

SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** ReactJS, NodeJS, Spring Boot, Java Servlet, JDBC, Maven
- **Database:** MySQL, MariaDB, SQL
- **Tools:** GitHub, AWS EC2, Apache Tomcat, Vercel, Linux

PROJECTS

BusinessHubs

01/2023 – 02/2023 • AWS EC2

Business Management System built to help in managing business operations.

- Built a multi-user BMS with worker management, attendance tracking, advance payments, invoice generation, CSV export, and WhatsApp integration.
- Deployed on AWS EC2 (Amazon Linux 2023) with Tomcat 9 and MariaDB, configured as a systemd service.

Note-Taking Web Application

03/2023 – 04/2023 • AWS EC2

Full-stack note-taking web application for efficient note management.

- Developed app with user authentication, CRUD operations, and persistent MySQL storage.
- Deployed to AWS EC2 with Tomcat 9 and MariaDB; resolved DB connectivity and server configuration issues.
